Event connectivity

wireless solutions

Enjoy superior user experience and professional quality connectivity for your event crew, partners, clients and guests. Managed, monitored and stress-free.

WiFi

Design   **Architecture**   **Build**

Monitoring & reporting

Working with greenfield sites, we build robust, reliable WiFi networks from the ground up, that seamlessly connect your client devices.

Designed to address coverage, capacity and contention, we're market leaders in high-availability WiFi networks, boasting 99.99% uptime, every time.

Real-time monitoring and reporting of useage, bandwidth, devices and uptime gives notification of any issue within 5 seconds.

Services

Revenue generation   **Consultancy**

Captive portals   **Technology integration**

Get more from your WiFi service with our revenue generation services, including sponsorship and partnership opportunities that generate additional revenue from your events.

We've helped events to increase online revenues by up to 25%. We also provide captive portal technology and consult on integrated devices from PDQs to CCTV and VOIP to give you a single connectivity partner for all devices.

Internet

Satellite   **Fibre**

4G/5G   **Combination**

We can provide a temporary internet service for your event site, or work with pre-existing internet installations. Whether installing, modifying or extending an internet supply, we carry out site audits to ensure that the bandwidth is fit for purpose. And then some.
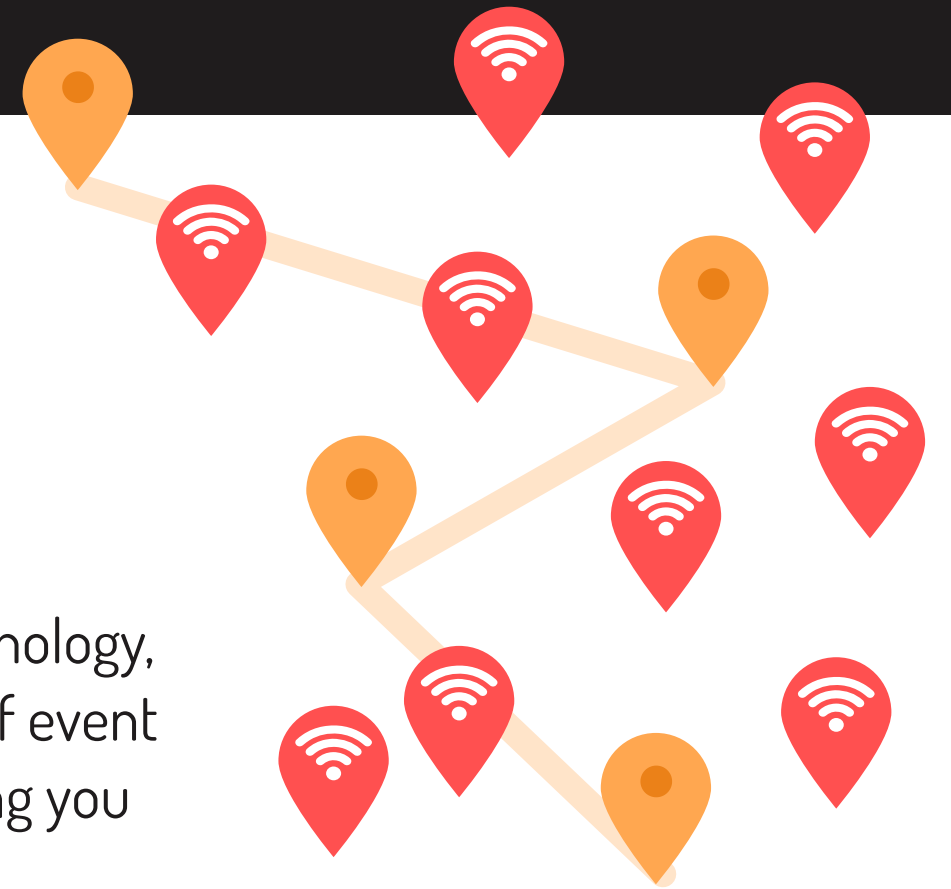

As part of our service, we will review, advise on and implement the best internet for your event site(s), taking into account contention and services in the local vicinity.

"The Wireless Solutions team's expertise is second to none. They've delivered the best WiFi results we've ever experienced, and more than this, have become a trusted and respected member of the team. They bring ideas and innovation, and most importantly, deliver the goods."
